## BRIEF DESCRIPTION

Rashmi jha is a brilliant teacher in textile fields. She teach imagining. She is perfect in textile fields. She always creative mind. She teach very politely. She motivate her students all time . She give message all teacher's- The aim of teaching is simple: it is to make student learning possible...To teach is to make an assumption about what and how the student learns; therefore, to teach well implies learning about students' learning".

At University level, we hope that students will provide their own motivation and their own discipline, and bring their own, already developed cognitive abilities to bear on the subject matter. Nevertheless, the teacher still has a crucial and demanding role to play in the process of student learning, by creating a context in which the students' desire and ability to learn can work most effectively.

The task of the teacher in higher education has many dimensions: it involves the provision of a broad context of knowledge within which students can locate and understand the content of their more specific studies; it involves the creation of a learning environment in which students are encouraged to think carefully and critically and express their thoughts, and in which they wish to confront and resolve difficulties rather than gloss over them, it involves constantly monitoring and reflecting on the processes of teaching and student understanding and seeking to improve them. Most difficult of all perhaps, it involves helping students to achieve their own aims, and adopt the notion that underlies higher education: that students' learning requires from them commitment, work, responsibility for their own learning, and a willingness to take risks, and that this process has its rewards, not the least of which is that learning can be fun!

It just needs to be real, determined, and accessible. Listeners crave intimacy with speakers.Great speakers keep it simple. They use short sentences. They use everyday language to make complicated topics clear and understandable. They don't show off their expertise by using a specialized vocabulary. They use metaphors that appeal to all of us, such as, "On healthcare.gov, you can buy a Rolls Royce, a Chevrolet, or a jalopy policy, and they all cost more than they used to." You don't have to tell jokes, but it's nice if you can come across as having a sense of warmth and ease. When asked what are the most important elements of any speech, Kennedy's speechwriter, Ted Sorenson, said, "Brevity, levity, and charity." ## BRIEF DESCRIPTION

She is a strict teacher however very funny and caring in nature. She is very disciplined and punctual. She does her all the works and projects related to the class at right time without getting late. I like her very much as she tries very easy ways to teach us good things. We enjoy her class. She makes us laugh by telling lots of jokes in between when she teaches. She also guides us very well during any school or inter-school competition of dance, sports, academic, etc. She teaches us to share things in class among our colleagues such as lunch or other needed things. In spite of the subjects, she teaches good ethics and etiquette also to make us strong by character. May be; she will not be our teacher in next class however; her teachings will always be with us and show us way to difficult situations. She is very caring and loving in nature. She has been the gold medalist in the university she got her higher education. She would always be my best teacher. She goes to her home with us in the school bus where we enjoy a lot by singing songs and reciting poems in the bus.

## BRIEF DESCRIPTION

She is very knowledgeable person and she is very hard worker. Many clients will ask for advice and ideas on how to cut or style their hair. Being creative is fun and so is a career in hairstyling. Since hairstylists work with clients on a daily basis, they must be pleasant, friendly, and able to interact with customers in order to retain them. The customer is always first and offering good customer service will allow them to spread the word. This buzz will keep the appointment book full and lead to happy customers coming back for more. Ultimately, the hairstylists will want to create a true connection with clients. Part of customer service in a saloon is selling styling products. A good hairstylist will be able to identify a need for the client and offer the right styling products for their situation. It is also important for the hairstylists to throw in something extra to show the client they are valuable. Maybe the hairstylists can offer the client a dab of gel to style their hair or a warm towel to remove the hair on their face and neck. These little extras will go along way in creating a pleasant experience. Hairstylists should be good listeners. A good listener gives their full attention. Keeping an open mind will allow the client to join the conversation about the best hairstyle for them.

She is very knowledgeable person and she is very hard worker. Many clients will ask for advice and ideas on how to cut or style their hair. Being creative is fun and so is a career in hairstyling. Since hairstylists work with clients on a daily basis, they must be pleasant, friendly, and able to interact with customers in order to retain them. The customer is always first and offering good customer service will allow them to spread the word. This buzz will keep the appointment book full and lead to happy customers coming back for more. Ultimately, the hairstylists will want to create a true connection with clients. Part of customer service in a saloon is selling styling products. A good hairstylist will be able to identify a need for the client and offer the right styling products for their situation. It is also important for the hairstylists to throw in something extra to show the client they are valuable. Maybe the hairstylists can offer the client a dab of gel to style their hair or a warm towel to remove the hair on their face and neck. These little extras will go along way in creating a pleasant experience. Hairstylists should be good listeners. A good listener gives their full attention. Keeping an open mind will allow the client to join the conversation about the best hairstyle for them.

## BRIEF DESCRIPTION

She is very knowledgeable person and she is very hard worker. Many clients will ask for advice and ideas on how to cut or style their hair. Being creative is fun and so is a career in hairstyling. Since hairstylists work with clients on a daily basis, they must be pleasant, friendly, and able to interact with customers in order to retain them. The customer is always first and offering good customer service will allow them to spread the word. This buzz will keep the appointment book full and lead to happy customers coming back for more. Ultimately, the hairstylists will want to create a true connection with clients. Part of customer service in a saloon is selling styling products. A good hairstylist will be able to identify a need for the client and offer the right styling products for their situation. It is also important for the hairstylists to throw in something extra to show the client they are valuable. Maybe the hairstylists can offer the client a dab of gel to style their hair or a warm towel to remove the hair on their face and neck. These little extras will go along way in creating a pleasant experience. Hairstylists should be good listeners. A good listener gives their full attention. Keeping an open mind will allow the client to join the conversation about the best hairstyle for them.

Working in the hospital puts nurses in a lot of work hazards. Take, for example, being exposed to infected body fluids. Apart from that, lifting patients of all sizes can also put your safety at risk. Nurses also have to deal with sharps and needles and running on slippery floors during emergencies

Unfortunately, not all veteran Nurses are that welcoming. These attitudes tend to dull the enthusiasm of new Nurses enough to make them question themselves if they made the right career choice. You are all on the same team, strengthen your team by welcoming new Nurses and being a little more patient with them. The compensations Nurses receive depend on many factors. Aside from specialty, their place of work tends to affect the salary they get, as well. Having a higher degree counts as well. Salary is a common reason why Nurses leave a hospital.

Working in the hospital puts nurses in a lot of work hazards. Take, for example, being exposed to infected body fluids. Apart from that, lifting patients of all sizes can also put your safety at risk. Nurses also have to deal with sharps and needles and running on slippery floors during emergencies

Unfortunately, not all veteran Nurses are that welcoming. These attitudes tend to dull the enthusiasm of new Nurses enough to make them question themselves if they made the right career choice. You are all on the same team, strengthen your team by welcoming new Nurses and being a little more patient with them. The compensations Nurses receive depend on many factors. Aside from specialty, their place of work tends to affect the salary they get, as well. Having a higher degree counts as well. Salary is a common reason why Nurses leave a hospital

I have passed MBA from Kurukshetra university in 2016 and from there I got placed in Bharti Airtel ltd. As territory sales manager.

This was the beginning of my professional career. But before selection in airtel I was rejected in an interview before with Tata Docomo. At that time, I got very much disappointed but later on I prepared well for bharti airtel placement drive and got selected.

I worked in bharti airtel for 3.

It was really a good learning environment there to work with channel partners and retailers. But gradually business environment had a drastic change and telecom industry started declining day by day.

It also affected working environment at airtel making it little uncomfortable and made me switch to another industry in kansai nerolac paints.

I have been here from last 2months and there is also a lot of learning to grow and enhance my skills and confidence.life require changes though job requires a lot of traveling but at the same time there is flexibility regarding dead line

New generation requirements are different and also changing so understanding new method is also a tough task continuous evaluation of students lead to ur own evaluation the number of student passing the exam lead to ur own success. Building rapport with our student and also performing the task of councillor require proper understanding between u and ur student. I also cope with these issues and coping up with these issues result in self confidence. I face a new challenge by every batch but at the same time keep patience. And positive energy. Sharing this experience with school students can be a wonderful experience for me as my journey of student to being a head of department will also give me a chance to motivate student towards their goal. And also working with coworkers building rapport with them needs to be patient at the same time.
